What will it seal?

All in One CPL sealer is ideal to seal and protect all man-made tiles to give great stain protection on ceramic & porcelain. Using The Tile Master 'Active Compound Resin' Protection System, your tiles are protected from dirt, grime and daily food spills with our invisible and breathable sealer.

Warning: does not protect stone from acid or chemical damage, surface wear or scratching.

Does not form layers or films and does not create a shine.

Where to use

Perfect for use on your floors, walls, wet rooms & countertops in your kitchen, hallway, bathroom, patios, swimming pools or anywhere around your home or garden.

Benefits

- ✓ Gives excellent protection against both oil and water based stains
- ✓ Laboratory certified as safe for food preparation areas and worktops
- ✓ Protects and seals both indoor and outdoor surfaces
- ✓ Easy to apply and ready to use
- ✓ Does not change the appearance of most surface types
- ✓ Aids maintenance and makes it easy to clean your floor

How to use & apply

- 1 Always TEST PRODUCT ON SMALL AREA FIRST. Allow to cure for 24 hrs and check for desired results, colour change and protection level.
- 2 Check that area is dry, clean and free of all residue and previous treatments
- 3 Evenly apply one generous coat of All in One CPL sealer to saturate the tile. The tile should hold a wet or glass like look for about 15 seconds. Apply more sealer if required.
- 4 After 10 minutes or before the sealer dries on the surface, remove and buff off any excess sealer using clean and dry white towels or cloths. To remove stubborn residue, simply reactivate using a clean cloth, slightly wet with All in One CPL sealer
- 5 We recommend applying the product to 2-3m² at a time

Coverage rates per 1 litre per coat

Lappato 40 – 60m²

Polished porcelain 40 – 60m²

Ceramic and porcelain grout sealing 35 – 75m²

Floor preservation and ongoing maintenance

Surfaces treated with All in One CPL sealer, should be maintained with Tile Master Cleaner No.1 depending on surface type, diluted at 1-200, (1 cap in 5 litres of Water)
