

To get the longest life and preserve the beauty of your tiles & stone, follow these simple tips:

Coasters:

Use coasters under all glasses, particularly those containing alcohol or citrus juices.

Trivets:

While many stones can withstand heat, the use of trivets or mats is recommended.

Dust Mopping:

Dust mop interior floors frequently using a clean non-treated dry dust mop. Sand, dirt and grit are abrasive and can damage natural stone.

Mats/rugs:

Mats or area rugs inside and outside an entrance will help to minimize the sand, dirt and grit that may scratch the stone floor. Be sure that the underside of the mat or rug is a slip resistant surface.

Vacuum cleaners:

If used, be sure the metal or plastic attachments or the wheels are not worn as they can scratch the surface of some stones.

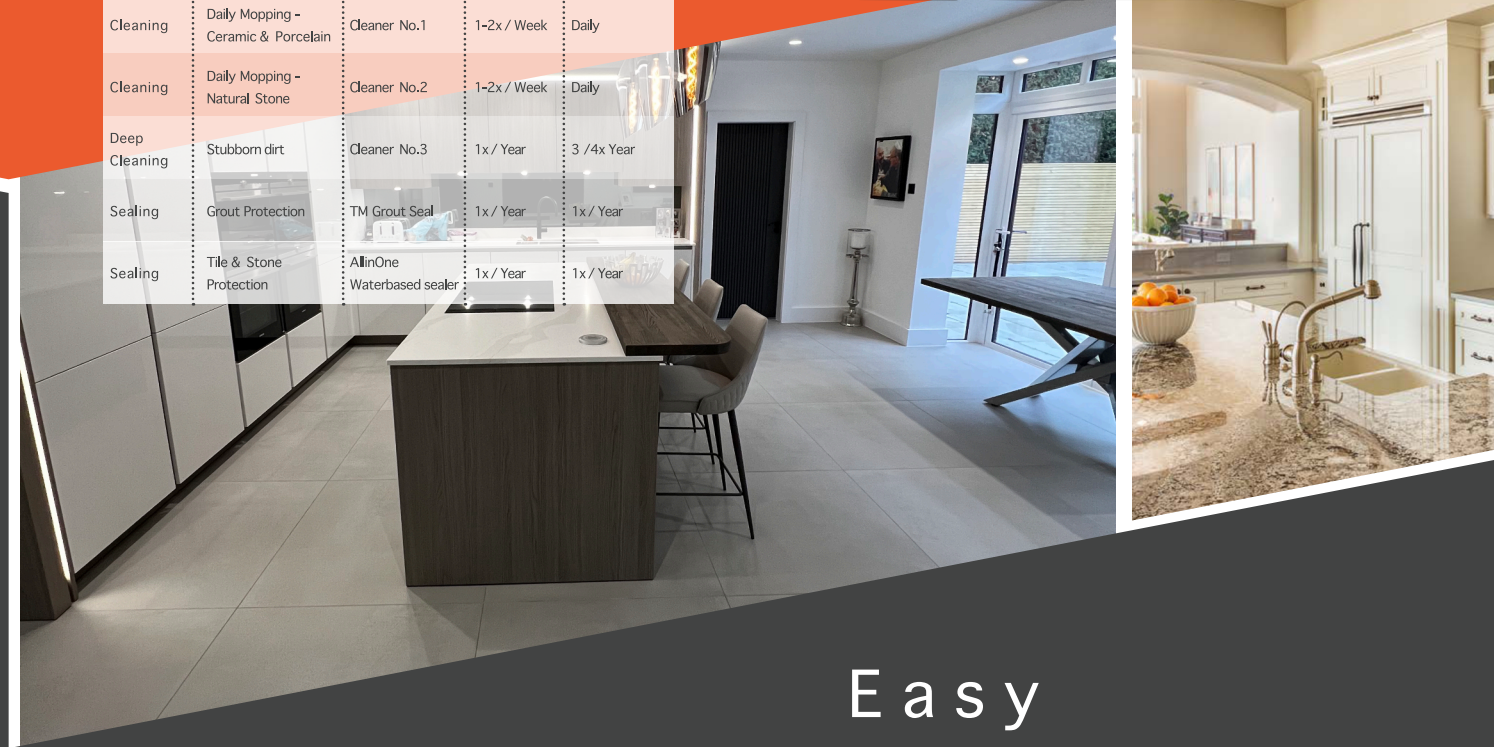

Spills:

Blot the spill with a paper towel immediately. Don't wipe the area, it will spread the spill. Flush the area with water and mild soap and rinse several times. Dry the area thoroughly with a soft cloth. Repeat as necessary.

General Maintenance Schedule

Type	Application	Product	Domestic	Commercial
Cleaning	Daily Mopping - Ceramic & Porcelain	Cleaner No.1	1-2x / Week	Daily
Cleaning	Daily Mopping - Natural Stone	Cleaner No.2	1-2x / Week	Daily

Cleaner No 1

Porcelain and ceramic
LVT & vinyl
Resilient flooring
Safety floor

Cleaner No 2

Marble, limestone & travertine
Slate and sandstone

✓
Perfect for daily mopping

Stain Away

Stain removal for all
stones and tiles

Cleaner No 5

Shower area
Glass
Bathroom fittings

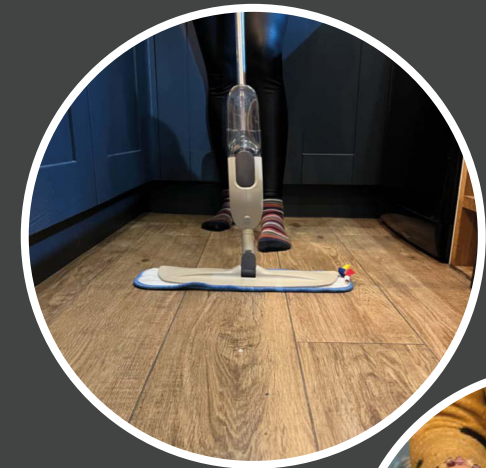

Cleaner No 6

Granite, and marble Work tops
Anti etch treated tops
Splash backs

Daily & Weekly Mopping

Floors

1. Vacuum or dust mop the flooring area
2. Dilute TileMaster Cleaner - 1 cap per 5 Litres of water (1/200 dilution) (excessive concentration of cleaner or soap may leave a film and cause streaks.)
3. Use a traditional mop or clean flat mop on floors for best results.
4. No rinsing is required with the Tile Master Cleaner as it dries residue free when used at 1/200 dilution.
5. Change the mop head or water frequently for best results.

Worktops

Spray cleaner No6 directly onto the surface and wipe with clean dry cloth

Bathroom Area

In the bathroom or other wet areas, soap scum can be minimized by using Tile Master Cleaner No5 once per month

Regular Sealing:

Sealing is a common step taken on tiles, grout and natural stones as an extra precaution against staining. We recommend regular sealing of stone to keep it at its optimal protection level. We would advise you seal is topped up every 12 - 24 months to keep the protection at its highest level. Contact your local expert today to discuss your sealing needs and annual Maintenance cleans.
